CANYON SPRINGS PAINT COLOR SCHEMES May 2021 How to use this book.

This book is intended to help the residents and management of Canyon Springs when it comes to repainting your house. The original manufacturer of paint for most of our houses (Colorwheel) was purchased by Sherwin Williams 5 years ago and they no longer sell or refer to Colorwheel paint. Color swatches based on Colorwheel are no longer available. So, we got the original schemes from GL Homes and a list of color schemes for each lot as well. I got Sherwin Williams to convert the original Colorwheel colors to current Sherwin Williams colors so we could obtain and share the swatches of what each color scheme looks like when applied new.

I am not suggesting that you have to use Sherwin Williams when repainting your house. You can take these swatches and color numbers to Benjamin Moore or Home Depot and get these colors reproduced. But whatever you do, buy the highest quality paint you can afford as the beautiful Florida weather is harsh on paint and we want our community to look great. During my tour of the community, I noticed that many houses are faded, and the position of the sun affects how these pictures came out. However, the color swatches are a good representation of the original colors and how the homes will look after repainting.

The ACC is in charge of the colors of our houses and for approving all painting projects. You will always get approved to repaint with the original colors as long as the rest of your application is complete according Canyon Spring Documents. The paint finish needs to be flat or matte to be consistent with the community. Yes, it is a known fact that gloss is easier to clean, but we don't look to clean food or finger paint off exterior walls.

A color scheme consists of a roof color, wall paint colors and driveway colors. A quick history lesson of this community. The community design is considered Mediterranean and the color schemes are earth tones. GL homes offered 2 to 4 walls colors for each roof color. Then we pick a driveway to match the scheme based on what driveway upgrade was purchased. The point of this is that there is more than one combination of wall colors that works with your roof however the driveway may clash with a different scheme as the decorating staff at GL Homes helped pick out the driveway choice once the roof and wall colors were picked. Also keep in mind that you won't get approved for paint colors if your immediate neighbor's house has that color.

You can find wall colors that will work with your roof by looking for a color scheme that includes your roof color. Then the combination with the driveway has to be approved by the ACC.

This project took an enormous amount of my personal time and I hope it will be used in the way I described, and I am sure the community will appreciate this work which is intended to help us with the consistency of colors and beauty of Canyon Springs. With all this said, keeping up the exterior of our homes will add to the enjoyment of living in Canyon Springs, and will also keep our property values up.
